Mitt Arv Technologies Pvt Ltd.
2022-11 – 2023-03.

Software Engineering Intern
Duration: 4 months
Using flutter framework in the development translated UI/UX design wireframes to code and solving major & minor bugs of Mitt Arv mobile application, used Jira as a task management tool accomplish tasks on agile processes, used git and git hub (git version control system) for maintaining the code between developers, having decent amount of knowledge about google workspace.

Duly care
2023-05 – 2023-06.

Software Engineering Intern
Duration: 1 months
Using flutter framework in the development translated UI/UX design wireframes to code and solving major & minor bugs of Duly care mobile application, used git and git hub (git version control system).

PROJECTS

Mobile Application
2023-03 – 2023-04

Amazon Clone | *Working video   Source code   Download APK*
Duration: 1 months.
This project is a full-stack e-commerce app built with Flutter, Node.js, Express, MongoDB, and Mongoose. The UI was created from scratch using Flutter, and REST APIs were built using Node.js and Express, with data stored in MongoDB using Mongoose. Flutter's Models and State Management tool were utilized to connect the backend with the front end, creating a seamless experience for users. The app is cross-platform, working on both Android and iOS, and backend is hosted on Render.

Mobile Application
2023-03 – 2023-03

Event Updates | *Working video   Source code   Download APK*
Duration: 4 days.
This The app is built using Flutter and integrates with an API to provide users with up-to-date information about events. It has three screens - the home screen displaying all events, the search screen for sorting and finding events quickly, and the event detail screen showing all the information about a selected event.

Web Application
2022-04 – 2022-06

ABC Jobs Community portal | *Working video   Source code*
Duration: 2 months.
This project objective was to works similar to LinkedIn it has registration, login page with spiring security and many other interesting functionalities like admin can post jobs, update member, send bulk email whereas user can apply for jobs search other members in the portal and update their profile information, project was made on spring MVC framework.

QUALIFICATION

DEGREE/GRADE	INSTITUTION	Year of passing
